Patent No. 5958784

GENERAL INFORMATION:

APPLICANT: Benner, Steven A.

TITLE OF INVENTION: Predicting Folded Structures of Proteins

NUMBER OF SEQUENCES: 114

CORRESPONDENCE ADDRESS:

STREET: Hadlaubstrasse 151

CITY: Zurich

STATE: none

COUNTRY: Switzerland

ZIP: (note: this is an international post code) CH-8092

COMPUTER READABLE FORM:

MEDIUM TYPE: 3.5 inch diskette, 1.4 Mb storage
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ;
